

School Security

New safety and security procedures are in place for this school year! Please be advised that these new procedures must be adhered to by **all visitors** to the building to ensure the safety of all students. Please be aware of the following:

Front Door Access

- **All** school doors will remain locked. Visitors will be required to identify themselves and their purpose for visiting prior to receiving access to the building. This will be done through a surveillance camera and a “buzz in” system at the ***front right door***. *(Please push the button on the brick wall to call into the office.)*
- After entering the building, all visitors will be required to immediately report to the front office for proper identification.

Visitor Identification

- Once visitors have reported to the front office, a valid photo identification **MUST** be presented to school personnel for visitor identification.
- Visitor information will be recorded electronically by a Visitor Management System and a photo identification badge will be issued.
- Before exiting the building, all visitors must properly check-out in the office.

School Security Deputy

- BIS will have a School Security Deputy on the premises during school day hours to help ensure safety in the building.

Thank you for your patience and support while we are implementing these changes
